Introduction

This mobile app prototype for Coach Cricket, Classic Cricket AI Conversation Partner, is planned to offer access to an AI partner which exchanges in-depth information with the Cricket enthusiast regarding analyses, tutorials, current and historical games, star athletes, and also allows them to access a community forum to connect them to the world-wide Cricket universe.

Web Research

Currently there are several Cricket apps available for download. The top two are Cricket Line Guru App and IIC Official.

Cricket Line Guru App

Screenshot of Cricket Line Guru. [PNG]. (n.d.). Cricket Line Guru. https://play.google.com/store/apps/details?id=com.app.cricketapp&hl=en_CA

IIC Official

Screenshot of IIC Official Logo. [PNG]. (n.d.). ICC Official. https://play.google.com/store/apps/details?id=com.pl.cwc_2015&hl=en_CA

Both apps have some similar services that Coach Cricket will provide:

- Access to rosters and venues pertaining to different world-wide Cricket leagues
- Player and team stats
- Live streams of matches with commentary and analyses
- Cricket-related news
- Polling to get the users opinion on the matches

However, neither of those apps have an AI conversation partner like Coach Cricket that can converse with the user. This is why Coach Cricket is a promising app. It will not only

connect the user to the aforementioned services but will learn about the user's niche interests on that information in order search and provide more specialized information. For instance, if the user is a coach who mentions they would like a breakdown of the mechanics of a particular play from a classic game, it can search the web for the play from current games to offer the user diverse types of video analyses by other coaches.

To enable Coach Cricket to have the most effective ability to respond to the user, applying the "Idea/Concept Review & Selection" strategy from "Phase Four: Ideation and Concept Development (ICD)" of Idris Mootee's paper (2011), "Strategic innovation and the fuzzy front end", would help create the most ideal preliminary version of Coach Cricket for initial public release. (paras. 68-76.)

The strategy uses rigorous group review with deeper research and development on the distinctive features of the app to see which ideas are the most feasible to execute within the project's triple constraints of time, scope, and budget. For Coach Cricket, the strategy would help in developing a more accurate response from the AI conversation partner toward the user. It would also help the AI conversation partner to precisely fetch the exact clip of a specific play that the user is asking for instead of giving a general search history of similar plays which is what most apps currently provide. Using that strategy would help move Coach Cricket closer to the leading edge of tangible, life-like customer interaction in sports apps.

Business Models

Coach Cricket has the potential for two strong potential revenue streams as its business models.

The first stream is from the business-to-customer platform where tiered membership to remove ads and gain a benefit at three distinct levels. That way, any user can join at any income level. On Level One of the tiers, it is the free membership, with basic AI partner conversation related to tutorials, access to one of their favourite team's roster and schedule, and standings of two of their favourite leagues, no forum access and includes ads. Level Two, has access to what Level One has plus Cricket news links, basic forum access (can comment on content but cannot upload content), half the ads, and a selection of Classic match videos. Level Three has all access to every feature that Coach Cricket provides, tutorials, analyses, forum, news, stats, rosters, and leagues, plus allows the AI conversation to search the entire internet for niche Cricket-related topics the user is interested in.

The second revenue stream is from the business-to-business platform where the leagues have Coach Cricket as an official partner who cross-sells their merchandise, provides links to their websites, and show their ads, so it receives a commission on those profits.

The potential for growth income with these streams are fairly moderate to high considering how long Cricket has been played and how many enthusiasts it has acquired over the centuries.

Personas

The three personas that Coach Cricket is designed around are based on their technological skills first and then their level of Cricket knowledge so there is a novice user, an intermediate user, and an advanced user.

Persona 1: Meet Holly Blue, our advanced user.

Holly has been into sports all her life. She has been a Cricket fan because of the style of play and wants to keep up with the matches and player stats.

Holly Blue

About	Personality
Age: 26	Patience: Moderate
Work: Physical Therapy Assistant	Fear: Moderate
Family: Single	Growth: High
Character: Focused	Adaptability: Moderate
Location: Boston, Massachusetts	Persistence: High
Education: College	Time Management: High
Computer Skills: Advanced	Networking: High
Computer Type: Laptop, Desktop	Online: Moderate
Background: Self-employed Personal Trainer	Social Media: High

Goals	Frustrations
To start and own a successful gym	Trying build the capital to start a gym
To live and work in Los Angeles, California	Salary Cap
To work for a professional sports team	Long hours

Conclusion

In conclusion, should Coach Cricket go to full launch, it has the potential to be both a very educational app for its users due the amount of Cricket education it can share with user, and a extremely lucrative one for its business partners due it's ability to connect Cricket enthusiasts with their services and products.
